I talked with Darryl about Lahaina. He has assigned Mark Tomomitsu to address the NPDES permit. They have looked at the permit application and understand its deficiencies. At this time, they do not have a clear direction of how they want to address the issue. I suggested Darryl check in with Watson regarding the seep data prior to our meeting next week. He was very interest in the tracer study report, but has not received a copy - have we? I haven't seen one either. Is it out?
