Just for context, region 7 staff have had direct peer exchange with the state of California on the exide cleanup and what region 7 has done in Omaha. I don't think LA county was included in that peer exchange at that time, but I will check.

Below is what we included in the exide paper we submitted in prep for Gina's meeting with Hilda solis:

Facilitation of a peer exchange with EPA Region 7's Remedial Project Manager for the Asarco Lead Smelter Site in Omaha.

Subject: Hilda Solis and Exide

Hilda come in to talk about Exide. The outcome was that Mathy will send her information on expedited assessments and cleanups of residential areas contaminated by lead that the agency conducted in Omaha to share with the DTSC. Hilda expressed frustration with the pace of the current work which this information may help with, as well as what she believes is poor outreach and education that lacks both rigor and cultural sensitivity. If the Omaha information looks like something that would help expedite the work underway in LA, then it would be great if you could make sure your team shares it at the monthly meetings.

She also asked what efforts were underway across the federal family in Flint related to job training, head start, medicaid, etc. I will have Micah and others who work with the Flint response team, gather that information and share it with her in case she wants to reach out to the other agencies and see if there is a willingness to provide similar services.

That's it.
