4/28/89

mtg w/ Carrier + attys

status report on site –

Cess: director's agr w/ TN
report issed Oct 88

installing gw extraction +
soil ventilation system
(vacuum extraction)

city has upgraded system on wells –
finished H_2O clean
city also replacing wells – one
should be finished end of yr,
another next yr

Vandiver: current well proposal has
been accepted by TN

shallow + deep gw extraction
planned

ongoing work based on ltr from TN
saying do this – no
order in place

10626276

p 2

Vandiver : to do now as Carrier sees:

1. begin remediation
2. fill in data gap in testing to date

concerns : same ol, same ol

Tobin :

1. surface cleanup can be concurrent w/ RI/FS R4 has done several that way + moved quickly on those sites

2. concern — on the NPL path now

Vandiver

not asking to be removed from proposed list — asking that final listing be deferred until other action completed

Randle

concerns not in ltrs

① insurance litig ongoing - better posi. if not SF

② toxic tort - Velsicol district -

Vandiver

① regardless of time - doesn't want to do RI/FS, believes past that

② one PRP operating facility not suited to CERCLA - better to RCRA

Taylor why did TN submit to NPL?

V - b/c K w/ EPA requires scoring of site to be submitted - not b/c TN felt site needed to be listed

p 4

V - never discussed RCRA w/ TN - TN said wanted to do state SF - never entered into order (director's ltr) (going back to TN SF or RCRA other options Carrier suggests)

VAH - we may be able to do it but why strain to go into another act

V - ① quicker
② Carrier will cooperate better outside CERCLA

Caucus

Tobin will stay w/in CERCLA want to proceed in consent fashion

V - not inclined to negotiate consent order + will contest a 106 -

p5

where left : CB contact back to Carrier
after more discussion w/in R4
