---

Thanks for the follow-up and I echo the appreciation for a productive meeting last week! I know it makes for a long day, but I really get a lot out of the discussions!

The action items you've listed below are the same items I had on my list, so I don't have anything to add. I will let others reply if they have additional items to include.

Thanks,
Emily

**Subject:** EPA/MDNR Quarterly Meeting Action Items

All,

Thanks for a productive meeting last week, it's always great to get together and discuss issues and concerns that impact R7 and MDNR. Below are a list of follow up/action items I captured during the meeting. If I've missed anything please feel free to reply to all and include the additional items. We'll be discussing and providing answers as quickly as possible.

1. EPA to provide email to MDNR requesting status of Delegation Rules.
2. EPA to provide clarity on next steps for Clean Data Determination Request and Certification of Monitoring Data
3. Proposed 2008 Transport Rule-EPA to provide clarity to MDNR on "Partial Remedy". Are there additional requirements for the state to address their transport obligation considering EPA only deems the Rule as a Partial Remedy?
4. MDNR to advise EPA on next steps for the Infrastructure SIPs.
5. EPA to provide feedback on language provided by MDNR for DRR sources (2000 tons/limit)
6. EPA to provide email to MDNR about potential Ozone Advance Workshop---Complete.
