---

Lori Edmo-Suppah:

As a follow-up the interview you conducted earlier today, attached is a figure from the Dust Control and Air Monitoring Plan (DCAMP) which shows the locations of the three fixed monitors. Those three fixed monitors, and five mobile monitors employed around work areas, combine to make eight.

Kelly Wright and I recently received a set of weekly monitoring reports from FMC. Either he or I could provide you with those if that level of detail is of interest.
