Subject: RCRA Pond UAO Weekly Reports #215 - September 15 - September 21, 2014

Greg,
As you had directed, FMC is providing a weekly report, pursuant to the RCRA Pond UAO, describing field activities conducted pursuant to work plans you have approved.
Work Performed this week:

- Continue implementation of the IWP and operation of one GES unit on a 6/7 schedule at the east perimeter standpipe on Pond 18A.
- Continue implementation of the IWP for gas extraction at Pond 15S on a 12/7 schedule using six GES units extracting at the southwest standpipe and two GES unit extracting from the east standpipe at Pond 15S.
- Continued continuous monitoring at three Pond 18A boundary locations and four 15S boundary monitoring locations during periods of gas extraction. There were no TWA or maximum values above the thresholds specified in the Air Monitoring Plan. A spreadsheet summarizing the results of this monitoring to date is attached.
- Other than continuous monitoring at Ponds 15S and 18A, no monitoring was performed or required pursuant to the approved work plans during the reporting period.
- Received EPA letter dated 9/15/14 approving RIWPs for Ponds 15S and

16S.

Problems Encountered:

None.

Unplanned Events Encountered:

None.

Work to be performed the following week:

- Continue implementation of the IWP and 6/7 operation of one GES unit at the east perimeter standpipe on Pond 18A.
- Continue implementation of the IWP and 12/7 operation at Pond 15S using six GES units extracting at the southwest standpipe and two GES units extracting from the east standpipe.
- Other than continuous monitoring at Ponds 15S and 18A, no monitoring is required to be performed pursuant to the approved work plans.
- Participate in site visit with EPA representatives Weigel and Meyer on 9/26/14.
