Subject: RE: FMC Independent Expert Review | Follow Up with Tribes on Several Items
Date: Monday, December 22, 2014 11:51:55 AM

Jill/All,

Thanks for working with Kelly to get the response below. We are doing the following:

1. We will let ANL know that the information I have listed under item 1 below is the information the Tribes wanted added to the list of references for ANL.
    a. As an aside, in order to complete the process of EPA and the Tribes providing references and information to ANL so they do not have an open-ended in flow of information, EPA HQ proposes that the Tribes and EPA HQ agree to 'cut off' our identifying/sending references and information to ANL one week after we hold the conference call with ANL for the Tribes to present their perspectives on the FMC OU.
    b. ** I ask that Kelly and the team let us know if this is reasonable or if we need to discuss this issue.
2. Mike Adam has reached out to Lou Martino of ANL and asked that Lou poll his team and identify dates and times between January 22 and the second week of February 2015 where they would be available for an up to 3 hour conference call/web meeting. Given time zone differences, ANL will focus on times that are in the afternoon Eastern Time to ensure availability of those in western time zones. I will send ANL available dates/times to you once we receive them.
    a. It also appears that Lou will have a suitable meeting space available at Department of Energy HQ in DC at L'Enfant Plaza. As Jill and I discussed yesterday, Jill would be able to participate in-person with Lou and some of us EPA HQ participants. Others would be able to call in and possibly also login to our Adobe Connect web meeting service. We will work with the Tribes and ANL on meeting logistics once we all agree on a day/time.
    b. ** I ask that Kelly and the team agree to provide the Tribes' presentation materials (PowerPoint slides?) to EPA HQ and ANL no later than one week prior to the scheduled conference call. This will allow time for participants to ensure they have the materials and can print them or otherwise have the available during the meeting.
3. Thank you for the written comments. Similar to your comments on ANL's proposal, EPA will review your comments and as you for any clarifications prior to our sending them to ANL. We will also prepare our comments and send them to you. If EPA HQ and the Tribes have any conflicting comments, we may need to convene a conference call to develop a mutual agreement on what to send to ANL so they have clear direction on how to proceed with use of review parameters for ETT's. Given work and holiday schedules, I expect we will send you EPA HQ's comments by January 9th.

If you have any questions or issues, please email or call me. I will be out of the office from December 23rd through January 2nd but can be reached via email or cell during that time.

Best regards,

Greg

Subject: RE: FMC Independent Expert Review | Follow Up with Tribes on Several Items

Greg,

I'm following up on your call from yesterday, in which you said you were waiting for a response on items 1-3 in your email below. I reached Kelly by phone at the end of the day yesterday, and he asked me to reply to you on his behalf.

1. Yes, the information you have listed under item 1 below is the information the Tribes wanted added to the list of references for ANL. The Tribes don't have any other documents to add to the list right now.
2. Thank you for agreeing to schedule a conference call for the Tribes to present their perspectives on the FMC OU. Kelly asked if you could propose some dates after January 21 when EPA and ANL will be available, and he'll try to arrange things on the tribal side.
3. Please find attached the Tribes' comments on ANL's review parameters.

Thank you very much for your patience.

Happy holidays to everyone!

Jill

Subject: FMC Independent Expert Review | Follow Up with Tribes on Several Items

Kelly et. al.,

I wanted to follow up with you on several items.

1. Additional Reference Items the Tribes wan added to the list for ANL

Thank you to Susan for providing additional clarity on the information to add to the list of reference information for Argonne's team, and to Kelly for speaking with Greg Weigel last week. I was able to speak with Greg W. yesterday.

Now I understand the extent of the information to be included when Susan says "Amended Work Orders and results." Based on my discussion with Greg W. , I understand the following should be added to the list and provided to ANL:

2006 Time-Critical Removal Action associated with Pond 16S Time-Critical Removal Action for Phosphine Gas
-- UAO [already provided to ANL]
-- Administrative Record index [http://www.epa.gov/region10/pdf/sites/emichaud/em2-ar-index.pdf]
-- Administrative Record contents [EPA Region 10 Records Center has burned the documents to a CD and has sent it to me; I will have Mike Adam send it to ANL as soon as it arrives]
-- 'Results' to include documents related to the implementation of the TCRA, such as Work Orders and amendments, progress reports, correspondence including email [Greg W. will develop an index of all these documents and make it available to EPA HQ and the Tribes by mid-December 2014; I will have Mike Adam send it to ANL as soon as it arrives; ANL can request copies of these documents through Mike Adam to Greg W.] {note: I understand from Greg W. that the Tribes have received all these implementation documents at the same time as Greg W. over the last 7 years}

2010 Time-Critical Removal Action associated with Time-Critical Removal Action for Phosphine Gas at Additional Closed Ponds
-- UAO [already provided to ANL]
-- Administrative Record index [http://www.epa.gov/region10/pdf/sites/emichaud/fmc-ar-index-092810.pdf]
-- Administrative Record contents [EPA Region 10 Records Center has burned the documents to a CD and has sent it to me; I will have Mike Adam send it to ANL as soon as it arrives]
-- 'Results' to include documents related to the implementation of the TCRA, such as Work Orders and amendments, progress reports, correspondence including email [Greg W. will develop an index of all these documents and make it available to EPA HQ and the Tribes by mid-December 2014; I will have Mike Adam send it to ANL as soon as it arrives; ANL can request copies of these documents through Mike Adam to Greg W.] {note: I understand from Greg W. that the Tribes have received all these implementation documents at the same time as Greg W. over the last 7 years}

We will update the list of reference documents to include the items described above. I understand these items conclude the Tribes' additions to the list. If this is incorrect, please provide your other additions right away.

2. Need to schedule conference with ANL so Tribes can present CSM and other perspectives to ANL

As we discussed during our 10/16/2014 call, the Tribes would like to make a presentation to the ANL team on the Tribes' conceptual site model and other perspectives on the FMC OU via teleconference or video conference. EPA HQ would like to schedule this conference to occur as soon as the Tribes are ready for their presentation and the ANL team and EPA HQ are available. Please let us know when you would be ready to present to the ANL team, with possible dates and times with the assumption of a 3 hour conference. If you require more than 3 hours, please let us know.

3. Need Tribes comments on ANL's Draft Review Parameters

Mike Adam provided the Tribes with a copy of ANL's draft review parameters on 11/4/2015 (also attached to this email). Note that ANL's file name call them 'final' review parameters, however they will not be finalized prior to EPA HQ and the Tribes providing their feedback to ANL. Please review the attachments and provide us with your comments by COB Tuesday, 11/25/2014. If you won't be able to provide comments by that time, please advise us of when you expect to provide your comments.

4. EPA HQ needs to expand conditional approval to ANL to include Task 2

Upon review of his prior direction to ANL, Mike Adam determined that ANL has not received approval to perform Task 2 (Review of Existing Site Characterization Information) beyond what they needed to do leading up to the September site visit. EPA HQ intends to give expanded conditional approval for ANL to continue working on "Review of Existing

Site Characterization Information." This would include the following caveats:

1. The Tribes are still going to give a presentation to Argonne, which is additional information, and this "continue working" does not preclude ANL's review and use of that information.
2. Draft Review Parameters: there may be some minor impacts as to some details that are relevant or not relevant given the agreement on the final Review Parameters (which I sent out this week as draft from Argonne).

Please let us know right away if you have issues regarding EPA HQ providing the conditional approval for ANL to perform Task 2.

If you have any questions or issues, please let me know.

Best,

Greg
