Dear Mr Sharpe,

This is in reply to your letter I recived to day, concerning the drums on my property.

I wanted to let you know your office is welcome to come back May 19th to collect, more samples, dirt and contents of the drums for your investigation.

I will not move them from where they are now.

The drums in question and their contents have been there in the same place, for around 10 years. When they were put there I was told there was no more to them than dishwashing detergent. I was told the contents were not toxic.

I don't understand why any one would complain after all these years. But I understand you have your job to do, so feel free to take the samples you need.

Thank you for your letter, I appreciate you letting me hear from you.

If I can be of any futher help in your investigation, please feel free to let me hear from you. Thank you yours truly

Ralph C Medley
