I am happy that you can be available on short notice, thank you.

I assume that you know the FMC site location, but let me know if you need specific directions. To go onto the site, we all need to attend a safety training in the morning that begins at 7:30 AM and my last up to two hours. Per the safety trainer, standard protocol is that we need these items to work on site: safety glasses, hard hat, hearing protection, safety toe boots, and leather gloves. I will make sure that your name is on the clearance list for the gate, and they can direct you to the training center location. If I receive any more specific details about that I will pass them on to you.

I will be on site with three other archaeologists. Since you can only be on site one day, our focus will start in the area where soil is proposed to be disturbed. Please let me know if there are any specific survey methods that your office prefers. The current planned approach based on ground visibility is for transects to be walked spaced 10 meters apart, but the final strategy is to be decided on site before we begin.

Let me know if you would like any further details about anything prior to going on site.

David

Hi David,

I am available to assist with the pedestrian survey on Tuesday, May 17. I have a scheduled training in Idaho Falls in Wednesday so i will be unavailable that day.

> LaRae,
> I am a cultural resources lead at Booz Allen Hamilton, and we have been working with the EPA regarding Section 106 consultation and compliance at the FMC Pocatello location. The EPA let me know today that I could contact you regarding the FMC Pocatello site and the planned cultural resources survey. I left a phone message for you and would like to discuss the location, survey plans, and concerns for cultural resources since I know that there has already been some discussion with the EPA about this.
> Typically I would send a formal request for consultation, and will prepare one, but given prior discussions that have occurred with the EPA and the short timeframe before a cultural resources survey is planned, I am hoping that you can be available for a preliminary discussion. We are planning to be at the location next week (Tuesday, 5/16 & Wednesday, 5/17) to conduct an intensive pedestrian survey. I am hoping that you, or other members of the Shoshone-Bannock Tribes cultural resources staff, might be available to conduct the survey with us or be available to meet during that time.
