---

Hello,

Congrats on a great training last week. We thought the presentations were very well done, and the exercises were a great addition. Hope you had a good relaxing weekend!

I spoke with Doug and Elizabeth from Lake County. It sounds like they expect to move offices March 1st, but the PM lab won't be up for 6 months. Given that, we think it'd be wise for us to pick a different district to include as part of the ARB TSA. Looking back at our prior discussions, SLO was mentioned as somewhere EPA and ARB haven't visited. There's also some interest by our management for us to go out and see the Nipomo Dunes situation first hand.

What do you think of us covering SLO? They might have some best practices that could be interesting as well.

Thanks!

-Gwen
