Other restrictions and rules apply so come by the Customer Service Office in the Charles Harris Financial Service Center at 311 Memorial Drive or call 434-799-5155 for details.

Re: Notice to Virginia Jurisdictional Customers of Demand Rebilling and Refund Plan Approval and Implementation

Dear Virginia Electric and Power Company Customer:

This letter is in follow-up to our letter dated May 30, 2017, concerning Virginia Electric and Power Company's demand rebilling and refund plan for those small and mid-size commercial customers that may have been over-billed for demand charges due to demand meter resetting issues during the 36-month period July, 2013 - June, 2016. The Virginia State Corporation Commission reviewed and approved our plan to rebill and refund affected customers for demand meter over-billing (Case No. PUR-2017-00046) on July 28, 2017.

With the assistance of a third-party consultant, we have completed our analysis and determined your account 7170425008 was over-billed for demand charges. Your current bill includes: a credit, which reflects a base refund for the amount your account was determined to have been over-billed; plus interest on the base refund; and a goodwill credit of 5 percent applied to the base refund amount to compensate for the inconvenience due to our error.

Please register or sign in to your online account at DominionEnergy.com to view your rebilling statement and Frequently Asked Questions regarding the rebilling. You may also contact us at DemandRebilling@dominionenergy.com or 888-291-0185 if you have questions after viewing your statement.

We have implemented protocols and training to remedy this issue and ensure it does not happen again. Thank you for letting us serve you, and we apologize for the inconvenience this caused you or your business.

Sincerely,

(b) (6)

Robert M. Blue
President

Re: Notice to Customers of Demand Rebilling and Refund

Dear Dominion Energy Virginia Customer:

A recent review of customer accounts with Advanced Metering Infrastructure (AMI or "smart") meters revealed some of our small and mid-size commercial customers were over-billed for demand charges, because the demand meters for those customers were not reset properly in some months.* We regret this inadequacy in our AMI meter process, and we are committed to provide refunds and take corrective measures in a prompt, fair and responsible manner.

With the assistance of a third-party consultant, we worked to identify which accounts were over-billed during the 36-month period from January, 2014 - December, 2016. During this review process, it was determined your account 4084345976 was over-billed for demand charges. Your current bill includes: a credit, which reflects a base refund for the amount your account was determined to have been over-billed; plus interest on the base refund; and a goodwill credit of 5 percent applied to the base refund amount to compensate for the inconvenience due to our error.

Please register or sign in to your online account at DominionEnergy.com to view your rebilling statement and Frequently Asked Questions regarding the rebilling. You may also contact us at DemandRebilling@dominionenergy.com or 888-291-0185 if you have questions after viewing your statement.

We have implemented protocols to remedy this issue and ensure it does not happen again. Thank you for letting us serve you, and we apologize for the inconvenience this caused you or your business.

Sincerely,

(b) (6) [redacted]

Robert M. Blue
President
Dominion Energy Virginia

*Your account's monthly billing is based on two separate measures of usage. The "demand" measure is based on the maximum flow of power used at any one interval during the billing period. The second measure, which is not affected by this demand meter billing issue, is based on the total electricity used during the billing period.

Understanding Your Bill

Applicable Riders: Charges applied to certain rate schedules to recover various costs associated with Dominion Energy's electric operation sand electricity production.

Demand Charge (kW): Largest electrical use or highest "demand" for electricity averaged in any 30-minute period per month measured in kilowatts (kW). Charge is calculated based on cost per kW used.

Distribution Service: Charges for the use of local wires, transformers, substations, and other equipment used to deliver electricity to your home or business. This service must be purchased from Dominion Energy Virginia.

Electricity Supply Service (ESS): Charges for the generation and transmission of electricity, including fuel. This service may be purchased from a licensed competitive service provider.

- **Generation:** Charges for the production of electricity from Dominion Energy's power plants.
- **Transmission:** Charges for moving electricity from Dominion Energy's power plants to substations.
- **Fuel:** Charges associated with the cost for fuel used to produce electricity, including transportation.

kWh (kilowatt hour): A measurement of electrical energy.

Late Payment Charge: Fee assessed on any unpaid Dominion Energy Virginia charges past due at the time of billing.

Multiplier: Some meters are programmed to record energy at a slower rate due to the demand needed. Once the readings are obtained, the usage is increased by the programmed rate (multiplier).
