Belfonte Ice Cream Case

Enforcement Sensitive

Dates:	12/5/16 & 12/7/16
Attendees:	Various
General Topic of Discussion:	Did the facility report the 7/7/2016 release to the LEPC/SERC? Were follow-up letters sent?

Preparation / Pre Meeting Notes:

None.

Notes:

At 1:08 called the Missouri Department of Natural Resources (MDNR) spill line at 573-634-2436 and talked to Ethan (who was manning the spill line). Asked if they had received a call from the facility in regards to the 7/7/2016 anhydrous ammonia release. Ethan indicated that he'd search the database and give me a call back.

Ethan called back around 1:40 and indicated that he had checked the Jackson County reports for 7/7/2016 and they had received a fax from the National Response Center regarding the release but no call/report from the facility.

Talked to Karen Eagleson (573-526-9240) with the Missouri Emergency Response Commission at 3:30pm. She indicated that the facility had not sent a 304(c) follow-up letter to the State Emergency Response Commission in regards to this release. She also did not see any record of a call in MDNR's spill database. She indicated that the only reason she knew it had occurred was because it was mentioned on the news.

I called Erin Lynch (816-701-8390) with the Mid America Local Emergency Planning Committee on 12/5/16 at 11:03 AM and 12/7/16 at 3:04 pm and left a voicemail. Still waiting to receive her reply.
