Subject: Our meetings the week of Nov 30 - Dec 4

June,

Regarding the webinar, EPA participants will need two access lines, one for our office here in San Francisco and one for Don Bussey in Las Vegas.

Our consultant Don Bussey is not available on Friday Dec 4 and since it is important that he be present during all of the discussions we will need to address sections 6 and 7 of the SOW from Monday to Thursday.

A final agenda has not been set for the meetings at this time. Our thinking is that there will be two meeting tracks, one for the section 6 and 7 issues and one for the tank operation and upgrade issues (sections 2, 3, 4, and 5). While there may be some overlap of issues when discussing the section 8 tasks, Risk and Vulnerability assessment, we expect the meetings to run concurrently.

Regarding section 6 and 7, we expect to discussions to begin on Monday November 30. These in-person meeting dates have been set for almost two months. Since your consultants and restoration staff are busy on Thursday Dec 3 then we will have to work through all of our issues on Mon - Wed. I expect that spending three days on the modeling, well network and investigation and remediation issues should be sufficient for developing the scopes for these tasks.

It was not perfectly clear from your email if Thursday Dec 3 is the only day that presents a conflict for the consultants and restoration staff. You state that "other" staff will be available all week. Does this include necessary staff that can speak to the issues covered under sections 6 and 7 of the SOW?

Please confirm that all necessary personnel, including any consultants you will be relying on, will be available and in attendance for the meetings on Monday Nov 30, Tuesday Dec 1 and Wednesday Dec 3.

Subject: RE: Red Hill - Followup to 10/26/15 Scoping Mtg - Past Work

Hi Bob,

OK, we will continue to work through process for the unredacted version.

Also, for the week of 30 Nov, many of the restoration staff and consultants have a large pre-arranged public meeting for Pearl Harbor and Hickam on 3 Dec, Thursday. We understand the priority on Red Hill but if the schedule is not yet arranged, may we request for Sections 7 and 6 to be scheduled on Friday (or not on Thursday). Other members of our staff have blocked out the entire week to be available any time needed.

Lastly, for the webinar on 17 Nov, do you have an estimate of how many users from EPA will be needing access?

Thank you,
June

Subject: [Non-DoD Source] RE: Red Hill - Followup to 10/26/15 Scoping Mtg - Past Work

June,

Thank you for the additional information. For now I think we can work with the redacted copy. Once all the NDAs are in place you can provide the unredacted version. Depending on how long the process takes you may want to begin it soon.

Most of the redacted information seems related to costs, so initial discussions can begin without cost being taken into consideration. However before final decisions are made cost information would be good to have, e.g number of new monitoring wells, we should all know what the cost per well is.

Subject: Red Hill - Followup to 10/26/15 Scoping Mtg - Past Work

Hi Bob and Steve,

Also on behalf of James Miyamoto and CDR Burr Vogel, we are submitting the attached coordination message with the Performance Work Statement for the Groundwater Modeling and Contaminant Fate and Transport Modeling we sent out last year. Although awarded, this contract was de-scoped and terminated due to the pending AOC.

We are also attaching the redacted version of the List of Considerations for these efforts as requested. It will take a little longer to get through the process for the unredacted version, but please let us know if you still need them.

These documents were requested in our Scoping Meeting of 10/26/2015.

v/r,
June

Subject: Red Hill - Query to Stakeholders

Bob/Steve:

As discussed during the October 26, 2015 scoping meetings, on behalf of James Miyamoto and CDR Burr Vogel, attached is our list of proposed questions for the Red Hill Scoping Meeting Stakeholders.

Vr,

Aaron
