Hi Al,

I can get you that letter (just trying to track down the pdf). As for getting together to discuss the Class II issues, my sense is that it might be more productive for your folks to initially be engaging with DOGGR as they work through these issues around aquifer exemptions.

David:

I have been reading through the attachment "Review of the Aquifer Exemptions – Draft Preliminary Findings" you sent and page 4 a March 1982 letter is reference. The letter apparently provided TDS values for all 87 of the non-hydrocarbon producing formations. Do you know where I can get a copy of that letter?

Our folks are pulling together information about our current Class II wells and the zones into which they inject. They are also looking at current management practices and alternatives. Would it be helpful to you and your staff to sit down and discuss what we find?

Al

Hi Al,

Good to talk with you this morning. Attached is EPA's letter and two attachments. Don't hesitate to contact me if you have any questions.

Regards,
David
