TELEPHONE CONVERSATION RECORD

DATE OF CALL: Dec 13-83 TIME OF CALL: 1015AM

PERSON ASKED FOR: P Culver PERSON CALLING: Earleen Wilkerson

OFFICE AND/OR PHONE: PBAF - relay of citizen (employee) complaint - McDonnell - Douglas - Ft Worth (Lambert Field)

SUBJECT: John Menefee called Senator Danforths office,

DISCUSSION: who contacted Earleen.

Mr Menefee had 3 allegations:

(1) Company has dumped 10,000 gallons of chromic acid into ditch near coldwater creek.

(2) Fumes from boiling chromic acid inside plant is causing problems.

(3) Asbestos dust from overhead piping.

Mr Menefee has contacted OSHA who said they don't respond where defense contractors are involved, only inspect plants at request of management.

Earleen talked with Wolfgang B, who told her we can only "advise" on asbestos - no authority for in plant conditions.

Danforths office also informed MDNR (Steiferman (sp?)).

Earleen will let Don Toensing know about chromic acid for potential follow up for water violations.

RCRA RECORDS CENTER

I explained to Earleen that our only potential involvement would be under RCRA, if the chromic acid were a regulated hazardous waste.

I told her we would attempt to follow up.

Original - Dave Doyle - for follow-up.
