Michelle,

Perfect. Thanks much. I'm sure that's a lovely little community in the lower left-hand corner of the map also.

Warren

Hi Warren,

Here is a map of the facility location. Please let me know if you need anything else.

Sincerely,

Michele

Sort of. Can I get a more specific location? Tupman is all we have currently. GIS coordinates, cross streets, TRS, anything would help. Thanks.

Warren

Hi Warren,

Its Elk Hills Power in Tupman. They have three Class I injection wells permitted by EPA. they've been injecting over 10 years. One failed a test of mechancial integrity in Dec 2013 and the well was shut in. They completed repairs this past Feb and re-tested so we are allowing them to use the well again. Does that help?

Regards,

Michele

HI Michelle,

I just received the Central Valley Water Board's copy of your Authorization to Inject letter for Well 18G-3A (dated 7 March 2014). I'm looking for a home for the correspondence in our office – or at least the proper database record to update. Can you provide a physical location for the well/facility? We don't plan to take any action. But should we receive a complaint or some other sort of contact, it would be nice to know sort of what's going on and who we might contact.

We have a record in our database for a power station under the name of Elk Hills Power, LLC, but we don't have them under a permit so the only location info we have is Tupman, CA. I'm wondering whether to tie this USEPA permit to that facility or if we actually have nothing in our database that pertains to this injection well.
