Subject: Request for aquifer exemption Freeport McMoran

I sat through a lot of meetings listening to Freeport McMoran's representative talk about how all their studies showed that their oil field is isolated from the 4 surrounding clean water aquifers. Earthquake zone...no problem, porous sand stone walls, no problem, couldn't happen, faults in their walls, no problem. Never once did I hear them guarantee 100% that their oil field full of toxic chemicals wouldn't contaminate our drinking water surrounding their oil field. This exemption is only for 30 wells, but it opens the door wide open for them, in the next phase to drill 450 additional wells.
For Freeport McMoran it's about profit, for us it our drinking water.
Please don't gamble with our water.
We are depending on you.
