Stella,

I made some minor changes to the file yesterday and it was attached as Revised. Could they please let us know what is needed to change from that file? also what phone number do you want listed? If it needs to be changed or deleted, please let me know--awaiting guidance.

Natalie

Hi Natalie--

Here's a photo that I received from Silvia yesterday with sections marked that Bill Jones had concerns about. Concerns included having Rob's direct contact info as the USEPA contact, and the SKOOR reference. Looks like from your last version that the facility name was corrected. Looks like there were concerns about the second section, but I don't have details on the specific needs for changes there.

Maywood, CA

Fruitland Magnesium Fire Incident

On June 14, 2016, a fire started at Panda International Trading located at 3570 Fruitland Avenue, in Maywood, CA. Fruitland Avenue is a commercial/light manufacturing district and directly bordering the south of the site is a residential neighborhood of single family homes. The facility holds businesses, Panda International Trading (PIT) and SKOOR Metals. PIT is a scrap metal yard that send scrap metal out in bulk for recovery and SKOOR Metals is a precious metals recovery operation that recovers precious metals from circuit boards and other electronics.

The U.S. Environmental Protection Agency (USEPA) is collecting air samples from affected homes that will be analyzed for metals only. Once the data has been analyzed by health officials re-occupancy will be determined. Ash samples were collected throughout the area, including a parking lot, the facility perimeter and the surface of two residences. These samples were analyzed for trace metals and hazardous chemicals, and results are pending. An entry team plans to enter the facility boundary to characterize the burn area on June 17, 2016.

The US EPA, Los Angeles County Fire Department, Health Hazardous Materials Division, and The County of Los Angeles Public Health are serving as the United Incident Command for this operation.
