I just talked to Sarah about giving her the map with no addresses on it. We usually include that type of info in public reports, as long as it is not detailed enough to be able to identify a specific location. I was planning to give her the one I just sent you with just the four well locations shown on it.

If the homeowners are OK with releasing their info I am OK with that.

Thanks Greg. One thing we were thinking is to reach out to the home owners who were sampled and ask them for permission to release their information to Environ for follow up. If you find that acceptable we'll proceed down the route of making contact with the four properties from yesterday.

Subject: FW: Well

FYI, I will be contact Ms. Beard today. May sample her well if we do more sampling, but we sampled wells just upstream and downstream of her location yesterday.

Greg,

A lady stopped at our office about an hour ago because her electrician told her she should have her well tested. I told her I would contact you as EPA was responding to homes in the immediate impact area. She lives on 11 acres just west of New Oxford on PA Rt 30. Her home is very close to the Creek and does flood from time to time.

Her contact information is:

Ex. 6 - Personal Privacy

I explained to her that your office had charted the area where there was potential for issues. If you felt it was an area where there could be a potential problem, you would respond with one of your contractors and Miller would be charged with the cost.

Please review and respond directly to her or give us your best direction in this matter.

Best Regards,

Charlie
