Re: Field Inp to John P. Saal (19-533) (5)
~~5~~-24-89

On May 24, 1989 Tom Moss and I went to the John P Saal site at 365 Ironsides to make a video recording at the site. We arrived at the site around 9:00 AM. It was a clear, sunny day. The building was locked up. There was oil over the ground and there were several pits filled with water - they had a petroleum odor. There ~~were~~ one tank lying on its side + was crushed. The place needs cleaning up.
