RE: Saad - Nashville Site # 19-533(2)

On 10-4-93, I talked to Fred about the site status. He doesn't know what is going on. He has given verbal comments to their legal staff (Beth Davis) concerning the April report submitted by the PRP's. He is basically not accepting it. The legal group was to ascertain site access but Beth has been pulled from this site and is doing other things. Wilda Cobb has taken over the legal role. Fred says that a unilateral order has been discussed but doesn't know if it or a Consent Order will be worked out. I will call the attorneys for more info. Another construction season is passing w/out work being done.
