Dear Carol:

Apologies. As it happens my calendar is out of date (the dates do keep changing or I'm just a "day late and a dollar short") and you are correct, July 10th is not a "WRR day". So I will be able to accompany you on 9-10 July. I'll be in on the 2nd as well as 7-8 July so I'm hoping that we can coordinate during one of those days.

Looking forward to working with you.

Best regards,

Charlie

Charlie -

Sorry to hear that. I understand. Unfortunately, we did not set the date.

Just to double check - perhaps the schedule was changed. The July calendar for the WRR field work shows the following dates in July: 7/16, 7/17, and 7/22-24.

Thanks for letting me know.

Carol

Dear Carol:

Unfortunately I have a conflict for the 10th--field assessments on the MD eastern shore for the Watershed

Resource Registry

Regards,
Charlie

Jessica and John - Previously, I submitted a request for Charlie to assist in review of the revised proposed project focusing on the wetland functional assessment submitted by the applicant. The Corps provided information about the project and the assessment was attached to the request. A site visit is scheduled for July 10th and both the myself and the Corps would appreciate Charlie's participation.

Charlie - I hope you can join us for the site visit in Virginia Beach area on July 10th. I reserved a GSA car and will be making hotels reservation today for 2 nights - July 9 and 10 - I can make your reservations at the same time if you want or I can provide the number for you to call. The other details are still being worked out.

Please let me know if you can make it and if you have any questions about the review materials.

Thanks everyone.

Carol

We will plan to be on site at 0900. I would appreciate Charlie attending, I will notify the consultants. As this is a day to review the functional assessment... that will be perfect.

Subject: [EXTERNAL] Tri-City Site Visit

Hi, Tucker.

What time the site visit on July 10, 2014? In light of the upcoming holiday I need to make travel arrangements by Wednesday, July 2, 2014. Also, Charlie Rhodes, a wetland ecologist, is looking over the Wetland Functional Assessment the applicant submitted and asked about joining us for the site visit. Is that a possibility?

Any status updates?

Thanks.

Carol
