Suzanne

Here is the further revised NPL general conformity comments. I only looked at comment 1, but Scott edited the other comments as well based on Kate's comment boxes. The heavily RLSO version is hard (impossible) to read, so switching to final view makes it readable.

Let me know if this is version clearer to you or if you have questions. I will be available this evening if you reply.

Thanks

Carl Daly

Carl and Scott -
Before I send this on to Tim and Ken, I wanted to check in with you to see if you can address Kate's comments. She commented on the red-lined version, so if you hover over the edits, Kate's are the 4/14 edits and the comment bubbles.
Please let me know if you can address, or whether I should ask Ken and Tim for input.
Thanks!
Suzanne

Please see attached. I am confused about two main points. I think the problem is too many writers. If understood the point, I would rewrite...but am not sure that I do.

Kate
