I am in a training class in Philadelphia today. Looks like the breaks are 10-10:15am, 12-1pm and 2-2:15pm (all eastern), so I could give you a call then. If you are not available at those times, let me know what time would be good and I will step out of the class to call. Class ends at 3-3:30.

Alice,

I wanted to let you know we were delayed in our meeting Tuesday (related to Creditor bankruptcy proceeding-related delays from Monday - disappointingly, still working on data/document extraction), however we were able to follow-up on the SOW today. We also received update from our attorneys regarding their meeting with Juan on Monday. Sounds like we are moving forward well on all fronts.

In any case, this was intended to be a note that I may not get back with any formal response until the end of the week, but wanted to see if there was a convenient time tomorrow I might give you a call for a couple quick questions?

Thanks.

Juan

Attached are some thoughts about the schedule.

We should talk about whether we want to be talking about such details now to include in the SOW or later to include in the PMP.

I did get your e-mail just now that you will be discussing the SOW markup with your team tomorrow.

Attached is the revised draft SOW that should reflect our discussions on Friday 8/5.

I expect to send you (early next week) some thoughts about how the schedule might be re-arranged so that submissions are more staggered and follow more of a critical path. It is my understanding that we are both still exploring how EPA might become more comfortable with a 50%/90%/100% RD submittal structure. However, I also heard during last Friday's meeting that you were willing to accept using EPA's standard 30%/60%/95%/100% RD submittal structure. So our edits to the SOW assume using the

traditional structure for now, pending an exchange of information on the schedule next week.

Please let me know if you have any questions or would like to talk about any of these edits (212-637-4427).

(Attached is a PDF and Word version of the draft SOW. I will be sending the PDF to the Partner Agencies shortly.)

Alice,

Thanks for notice on the revised draft SOW that you expect to send to us and partner Agency's this Friday. We don't have any questions and appreciate the heads-up on the distribution.

Juan
