OPP Update methomyl and carbaryl draft BEs 4.3.17 after fead edits_ap.docx

Just took a quick peek at the OPP update and made some additional edits - sorry. Can you make sure FEAD is ok w/these before we figure out next steps for review? Thanks

Thanks Khue for the update. Not sure about the next level of review at this point, since we are using this document to obtain clearance for release of the draft BEs. I'll check in and get back to you if further review is needed.

Anita

Hi all,

This is the latest version of the OPP update, with minor edits from FEAD this morning. Where should this be routed next?

Status of the other communications pieces:

FR notice—routing for DD signature today

Instructions for commenters—routing for BC signature today

Let me know if you need anything else.

Hi ESA team,

Apparently we need the comms materials (OPP update) as close to final as soon as possible, given that the comms docs are needed in order to receive approval to release the draft BEs for carbaryl and methomyl. Khue, can you please track down the status of the OPP update and let FEAD know we need it ASAP in order to get clearance to release the draft BEs? Thanks.

Subject: draft OPP update for meth and carb draft BEs

Hi all,

I have not received a revised OPP update from FEAD for methomyl and carbaryl. The version that they sent us was based on the one written for the final BEs for the pilot chems. Not sure that this is very high priority for them.

Last time we met, we agreed that it would be faster for me to draft the OPP update, send around EFED and PRD for review, and then send it to FEAD. See attached for the draft—I based it on the version that we wrote for the draft BEs for pilot chems. I also put in a paragraph from the "instructions for commenters" that details how these docs are similar to the BEs for the pilot chems, and what changes were made from the pilot chems, and what changes we intend to make in the future.

It's likely that FEAD or the press office will trim this down. But let me know if you have comments.

Thanks,

Khue Nguyen
