HI Karen,

Thanks for compiling the list -- that is really helpful! I could probably be on the panel for emamectin if that slot is still open. Or, a later one might work (though I plan on being out the last week of July).

Also, on the list you have me listed as the biologist on abamectin, but Melissa P. is doing that one since PBO got postponed so I could work on methomyl ESA last year.

Thanks!

Donna

These are the chemicals.

Thanks

Karen
