All,

I have just been asked to see if it would be possible to move this field view to the following week (September 3, 4, or 5th)? All I need to know is if your calendars would allow you to switch to the following week for the field view of the Long Branch site. Just let me know what days would or would not work for you. I am not making a change of the plans to meet on August 28th, I am only checking to see if this is a possibility. Sorry for the short notice, but if you could, please let me know by 10 am tomorrow.... Thanks. Steve

All,

After coordination and some schedule shifting (thanks to all), we will meet on August 28th to field view the Long Branch stream mitigation site for the I-73 project. I believe the we should be able to cover the site in one day. At this time I am proposing that we meet at the Little Pee Dee State Park at 10 am on the 28th. The State Park will provide a place for us all to park our cars and then we can "ride together" to reduce the number of cars parking adjacent to the mitigation site. I will be working on finalizing arrangements with SCDOT/Baker and getting back to everyone by the end of this week. Let me know if you have any questions. Steve

Caveats: NONE

All,

I have heard from several of you who are interested in attending a field view of the Long Branch Stream mitigation site for the I-73 project. So now I am trying to set a date to do so. Right now I am looking at August 27, 28, or 29. I believe that we can complete this field view in one day, and I would propose that we would meet on site around 10 am. I would ask that if you are interested in attending, please let me know which day works for you. Once I hear from all interested, I will let you know the day.

Let me know if you have any questions. Thanks. Steve
