Hi Bernward,

Welcome back!

Attached are the comments on C1-2. I waited to send them to you since you were coming back this week.. I haven't heard from you so I assume you are back.. but I am not sure ..

Anyway, in reference to your item 3 below.. I agree that the chapters completely finalized until later this month. However, I disagree that these chapters need to wait until the draft SEIS to be finalized.
Actually, these chapters (as discussed) have to go through review and then become finalized before becoming the DSEIS..

So, I recommend that we have another meeting now .. well if you are back.

In the meantime:

1) I am available to quickly go over the comments with you. For the items that I did not complete or needed USACE input,we can discuss how to proceed.

2) I recommend that you start working on the regulation chapter (since it will not change very much) I think it is chapter 7.

I would like to have C1,2, 7 out for review soon. I will send more information next week on this.

3) I will be able to provide more details on the chapter 4 and alternatives analyses next week.

Thanks, Jeannie
