Importance: High

Good Afternoon:

I have not received a response to the inquiry below from either the Lewiston Environmental Board or any individual property owners. Please let me know if this means there is no interest in the gamma surveys requested by Gerry Wolfgang.

Regards,

Eric

Subject: USEPA-Town of Lewiston Environmental Board Request
Importance: High

Good Afternoon Carole:

Mike Basile (USEPA Public Affairs Official) attended Town of Lewiston Environmental Board Meeting on June 20th. There were six members of the commission present as well as two guests and the town clerk (I assume this is you?). Mike provided the attendees with a copy of the Holy Trinity fact sheet and also provided some maps to illustrate the areas that we have fenced off. The chairperson, Gerry Wolfgang, asked that we consider conducting residential surveying to the west of the fenced off area. There is no data or historical information that leads us to assess those areas. However, since the Town has requested, I would conduct gamma surveys in the yards and inside the homes if the individual resident desire. Meaning, we would need information on each resident (owner name, parcel #, address, phone/email) and then contact them to see if they want this survey to be conducted. I was told you were the contact to obtain this information and work through you.

Once we have contacted the residents, we would then need an access

agreement to perform these surveys. These surveys are non-intrusive and will give real time readings of the gamma radiation emanating from the surface.

Please advise. Thanks

Regards,

Eric
