If you read through the email chain below, you will see that it was decided at the time not to prepare an RSE for these sites prior to the handoff. The RSE was going to be part of the Action Memo you prepared.

Thanks. E. Mosher just told me to move forward. Do you have access to my R:drive for Wolff from the past work? The NYS information you mentioned last week could be shared that way. Please let me know. Thanks

Regards,

Eric

Thanks Nick. The pain in the throat is continuous. Definitely underestimated recovery and pain. I will read both thoroughly. However, in your opinion, which site is more critical and maybe more extensive? I would like to take on a site that has more challenge since I have experience.

Thanks and have a great holiday weekend.

Attached are final pre-remedial reports for Niagara Falls Boulevard and Holy Trinity Cemetery, both in western New York. These reports summarize the history of the Site and the work that pre-remedial did out there. There is a lot more to these files, especially historical information from DEC/DOH, that I can get to you at some point via Sharepoint.

Have a good weekend. Hope you are feeling better. Hang in there.

Thanks Nick. My schedule is packed with conferences, the ongoing Wolff/Moffat Street Assessment, Union training, FRP Unannounced Drills, etc. I just had throat surgery yesterday. I am working on medical AWL for the next week or so. Can't really talk yet. After I emailed you yesterday, Daloia assigned

me one of the sites. He said it was in Niagara Falls (Two are apparently in Niagara Falls and the other called Mount Kisko (spelling?) will be kept in your branch if I understand correctly). If anything, I would like to get the info on my assigned site to get started with planning. I was involved in getting the original sites with Angela Carpenter from NYS but have been given no real info on any of these sites since (type of rad, locations, etc.). Jim is now leaving for Florida until June. I cannot wait until he gets back to start planning and scheduling. Thanks

Importance: High

Hi Nick:

I spoke with Joe last week and he asked me to contact you regarding the assessment summaries for the three rad sites in upstate NY. I may be getting one of them but I wanted to understand the scope of all three in the hopes of assisting the assigned OSCs with my experience, equipment needs and sharing of state contacts.

Thanks

Regards,

Eric
