Eric,

Perhaps when you return on/after the 24th? I can't get out there this week...

Thanks,
Alan

Good afternoon,

Thank you for the update on this project. I am the person to receive these reports.

A few of things with the waste tire issue. First is that these are privately owned properties. Second is the City does not currently have any programs in place for used or waste tires. Third is that these properties overlap into the Town of Niagara (where most of the vegetative overgrowth is)... I believe that the City contracts with Modern Disposal to dispose of discarded tires that are collected by the City's DPW. I don't know what the cost is for disposal.

Please keep in touch and if there is anything that I can assist you with, let me know.

Alan

Good Afternoon Nusbaum:

Mike Basile (EPA Public Affairs) provided your contact information. I believe your office received our fact sheet for the Niagara Falls Boulevard Site. If not, that is attached.

Also attached is the initial Pollution Report for the removal action at Niagara Falls Boulevard Site. Please let me know if you want to be the contact to receive these reports or someone else in your office.

Lastly, as we cleared vegetation at this property, we retrieved some used tires. I have contacted the county and the state regarding a collection program and they do not have one. Does Niagara Falls have a program to recycle or dispose of tires?

Thanks

Regards,

Eric M. Daly
