Subject: RE: HOTSITE REPORT: Update - Warehouse Fire in Parkersburg, WV

The link to the EPA public website is at https://response.epa.gov/site/site_profile.aspx?site_id=12462.

If that does not work, you can go to epaosc.org, then link to the Websites tab at the top of the page, then pick Region 3 and filter the list using WV as the state. The Ames Warehouse Fire was the second link for West Virginia this morning.

Lora,
Good morning. Do you, or would someone copied on this email, be able to provide the links to the USEPA posted data please as reference below?

Thank you,
Rebecca

OSC Lindsey reports that the fire watch period continues through tomorrow, Tuesday October 31. There have been no flare ups since the fire watch began yesterday. The Unified Command met with the building owner to discuss next steps. WVDEP issued an Order to the property owner last week to comply with its NPDES permit, to provide a detailed inventory of the burned materials, and to provide detailed inventories from its other sites in West Virginia. The property owner has agreed to do the work as required by WVDEP and place a fence around the Site when the fire watch is over.

EPA is continuing 24-hour air monitoring activities through Tuesday, October 31. EPA's particulate monitoring data has been placed on the EPA's website as well as the ASPECT report. OSC Lindsey will work with the Public Health agencies to coordinate review of remaining data and public health messaging.

Wood County reported that their air monitoring consultant, CTEH, has demobed from the Site.
