You need google earth to open. I don't have it on my computer. Sorry!

Thanks. I tried this 5 different ways and it is not working for me still. I must be doing something wrong.

KMZ files are KML that has been zipped to reduce the file size, but otherwise function the same on Google Maps and Earth. The simplest way to uncompress is:

- Change the file extension of your KMZ file to .ZIP
- Uncompress your newly created .ZIP file to extract your KML file
- Import your KML file into Google Maps

Are you able to open this kmz file? I cannot. If you can and can send me back a screenshot that would be great.

Subject: Monitoring Locations for the Ames Warehouse Fire

Hi Lora

As we discussed – attached are the initial locations for the particulate monitoring .
