General Comment

Glyphosate is contaminating everything and it's never been studied in its full formulation. My children, who have food allergies, eczema and gut dysbiosis, along with millions of others, are part of a giant experiment in this toxic load game the world is playing. There is more than enough evidence to revoke the license of glyphosate; it's a probable carcinogen, endocrine disruptor, neurotoxin and antibiotic; which destroys gut bacteria needed for healthy immune function. This chemical is killing us and it's in our air, water, food and vaccines. For God's sake, wield your power for good and do the right thing, not the profitable thing. Help save my children. Revoke the license of glyphosate and end this.

Respectfully, a very worried mother,
Natalie Paffrath
