General Comment

Please stop using pesticides, herbicides, and rodanticides (methyl bromide causes pulmonary hemorraging yet it is used in every storage place in Los Angeles!) These things are killing people and pets as well as our whole ecosystem. Every chemical has an impact on all of us. The bees are dying, the runoff poisons the water causing algal blooms which kill the fish and coral reefs. The aerial spraying is disastrous affecting ALL life, especially bees.

Zika has been around for 74 years and didn't cause microencelphaly. The biocide they put in the water in Brazil is the likely cause of microencephaly.

What will you do when all the bugs are dead and the whole food chain collapses? When all our food and water are poisoned and the fish are all dead?

Get GMOs out of our food chain. Stop spraying Roundup everywhere and stop feeding us Glyphosate. It's in everything now. Even in California wine. Monsanto, who made Agent Orange, and killed a lot of people, should NOT be in charge of our food! This is WRONG!

This cannot BE about money. There must be ethics and morals. Please stop poisoning everything before it's too late. We have Autism skyrocketing and cancer and autoimmune diseases.

Read SILENT SPRING by Rachel Carson. Please please please stop poisoning our food, water, grass, rivers, lakes, and air.

Bats eat mosquitos. Build bat houses for the bats to eat mosquitos.

Why is Europe so much better at testing and banning chemicals? Why are we using chemicals they banned already???

No more poison. We must get back to nature or our whole ecosytem will collaspe and we will all die...
