Hi Brigette—Sure, but maybe we could discuss the CDR report in the meantime? I just wanted to make sure it doesn't have an "extra zero" by mistake.

Robert – I'm trying to get in touch with the right person in the company to discuss uses of asbestos. Can we push the call until I know exactly who that is? I'm guessing I should know sometime today, I just did not want to waste time.

Subject: Call Tomorrow

Brigette-

Following up on our conversation this afternoon, it would be good to talk with you tomorrow regarding the submission under CDR and also who I might talk to regarding offering Axiall the opportunity to meet with us.

As you may know, on November 29th, 2016, EPA identified the initial ten chemicals to undergo risk evaluation (including asbestos) under the revised Toxic Substances Control Act (TSCA).

The first phase of the evaluation process is for EPA to understand the current conditions of use for asbestos and release a scoping document sometime this summer for the risk evaluation. EPA held a public meeting in mid-February and requested comments up until March 15th on the current uses for asbestos. We've been working with ACC and its membership and wanted to offer the same opportunity to Axial.

Regards-
