A few more documents, although these are a bit wordy

- 2015 Report to Congress on changes being implemented in the IRIS program
- 2016 Memo to GAO on the activities to address the high risk finding
- Recent update on GAO activities prepared for this year's FMFIA report.

And this slide from an overall briefing on NCEA that Richard received recently that shows the regulatory drivers for three current assessments.

Statutory Relevance – an example

Bob, thank you. This is very helpful as I prepare for our discussion today.

Thank you,

Holly

Carol and Holly

Here are two files related to the current IRIS program and the thought piece on a "portfolio approach" that could be the future state. I would have sent this last night, but the email system was not cooperating with us. I may have two more detailed documents on the NAS recommendations and the GAO high risk list to send this morning, but wanted to at least get these to you now. Don't hesitate to call with any questions.
