Subject: Summary of discussion topics at the 2-23-17 Conference Call with Excelsior, ADEQ, and EPA

Hi Kate and Nancy,

Please find attached the summary of the topics discussed on the February 23 conference call with Excelsior. The focus of that conference call was the draft EPA comments on the December 2016 Excelsior responses to the previous EPA comments on the permit application for the Gunnison ISR project. The topic numbers are consistent with the format and comment numbers in the February 22, 2017 EPA comment document. Only the comments discussed on the call are listed and summarized.

Jim notes that the summary might be more comprehensive than you anticipate, but decided that it was necessary for the written record to fully document the comments that were discussed. (The bigger-picture understanding is that Excelsior will provide written responses to all comments and update the application at some point.)

If you have and questions, please let us know.

Thank you,

Jonathan
