Re: EPA Section 104(e) Request for Supplemental Information;
Yosemite Creek Superfund Site, San Francisco, California

Dear Mr. Massey:

As you may know, this firm represents Tap Plastics, Inc. ("Tap Plastics"), a de minimus PRP party to the 1996 De Minimus Buy-Out and Indemnity Agreement between the Bay Area Drum *Ad Hoc* PRP Group and Certain De Minimus PRPs, relating to the Bay Area Drum Site Superfund site located at 1212 Thomas Avenue in San Francisco (the "Site"). By letter dated October 19, 2010, we responded to a follow-up letter from the EPA dated August 24, 2010, which indicated our original response dated January 11, 2010, to the EPA's request for information ("RFI") pertaining to the Site, was inadequate.

As stated in our response letter, all pertinent information and documents were previously provided to the California Environmental Protection Agency, Department of Toxic Substances Control in 1992, in response to its investigation of the Site. In response to the RFI, Tap Plastics again undertook a thorough search for, and review of, documents in its possession that are relevant to this matter and re-verified that it is not able to locate any other information regarding drums or the contents of drums it allegedly sent to the Site. We understand that the EPA has DTSC's files regarding the BAD Site in its possession but to the extent that EPA is not in possession of those files, we have offered to cooperate with the EPA in any way necessary to obtain them. We have not yet received a response from the EPA.

We wish to continue to cooperate with the EPA in connection with its investigation of the Site and would appreciate any specific direction you may provide on what further response it seeks from Tap Plastics. My office direct dial is (650) 463-7803 and my mobile is Personal Privacy I hope to hear from you soon. Thank you in advance.

Very truly yours,

MILLER STARR REGALIA
