Subject: RE: Tribal Monitor Field Schedule Update

Norm,

Field activities to be performed next week along the East Fork of the Carson River have been postponed because the flow in the river is still too high to access the locations safely. Based on the current flow rate, we estimate it will be a month before the work can be completed. Britt already contacted Darrel to let him know of the cancellation, and she will contact him two weeks in advance of when a tribal monitor will be needed. I will be in touch when we have more information on the schedule for this activity and the work in the Camp Isbell area.

Jill

Norm,

This email is to inform you that the Camp Isbell hydrocarbon investigation is delayed. The U.S. EPA is working on a revised protocol for ensuring that sampling will not adversely affect cultural resources and will be conferring with the SHPOs/THPO on the protocol in the near future. Sampling will resume when that process is resolved. Britt has been in touch with Darrel Cruz to let him know.

Norm,

This email provides an update to the schedule for tasks at the Leviathan Mine Site that require a tribal monitor.

1. Drive-Point Piezometer Installation – Task complete.

2. Camp Isbell Hydrocarbon Investigation – Documentation of Camp Isbell is still in progress; thus, ground disturbing activities are delayed pending completion. The final day of documentation is scheduled for the week of July 17 and soil sampling is scheduled for the week of July 30.

2. East Fork Carson River – This work has been rescheduled for the week of August 14.

Britt Jones will continue to coordinate with Darrel Cruz.

Subject: RE: Tribal Monitor Field Schedule Update

Dear Norman,

To date, the tribal monitor has been on site for one day (May 23) to review the investigation locations for two of the three tasks that require a tribal monitor. The status and schedule for the three tasks are as follows:

1. Drive-Point Piezometer Installation – Ground-disturbing activities for this task are complete. The tribal monitor conducted a review of the ground surface within 3 meters surrounding all of the installation locations during the morning of May 23. No cultural

resources were noted during the review.

2. Camp Isbell Hydrocarbon Investigation – Ground-disturbing activities were delayed from the original schedule while we were waiting for the U.S. EPA's approval of the work plan. The tribal monitor conducted a review of the ground surface within 3 meters surrounding all of the soil sampling locations during the afternoon of May 23. No prehistoric cultural resources were noted during the review; however, Camp Isbell was identified as a historic mining camp. Documentation of Camp Isbell is scheduled for the week of June 26 and is expected to take 3 days. Soil sampling is scheduled for the week of July 10 and is expected to take 2 to 5 days. The need for a tribal monitor during documentation and/or soil sampling is pending a discussion between the site principal investigator and the THPO.

3. East Fork Carson River – A tribal monitor is needed for approximately 3 days of survey along the river. This work was originally scheduled for late June; however, it was postponed because of access and safety reasons associated with the high flow and water level resulting from the higher than average snowpack in the eastern Sierra. This work is tentatively planned for the week of July 17 and is estimated to take 3 days.

The RI Field Manager, Britt Jones, will continue to coordinate with Darrel Cruz regarding the schedule and exact dates that a tribal monitor is needed. If there are any more changes to the schedule noted above, Atlantic Richfield will notify Chairman Mortimer, Jane Long, Darrel Cruz, and you as requested.

If you have any questions or comments please contact Tony Brown at (657) 529-4537 or anthony.brown@bp.com.

Subject: Field Schedule

Mr. Lombardi,

Hello, my name is Norman Harry, Environmental Director, for the Washoe Tribe of Nevada and California. Previously, you've been corresponding with Michelle Hochrein from our Environmental Department. Michelle has accepted another position and is no longer with the Tribe. I have since assumed Michelle's role as it relates to the Leviathan Mine issues. I received a call this morning from Mr. Darrel Cruz, Washoe Tribe's Tribal Historic Preservation Officer/ Cultural Resource Office (THPO/CRO) regarding Tribal Monitor oversight questions.

Darrel sent me the attached 2017 Field Schedule identifying the proposed days for the use of a Tribal Monitor. Darrel stated after a discussion with the Tribal Monitor, the Monitor indicated he only worked one day out of the identified May schedule. I understand there are variances

identified in the proposed schedule, however, I would ask for consideration in the future, if there are any anticipated changes in the schedule, then the tribe needs to be notified in a timely manner, including the following Tribal representatives, Chairman Mortimer; Jane Long, Legal Counsel; Darrel Cruz, THPO/CRO; and myself. I have two questions. Have any of the noted three tasks involving the Tribal Monitor been completed or any portion thereof? Are the three tasks being rescheduled at a later date? If so, please send a revised schedule.

This consideration is aimed at maintaining effective communication, so our Tribal Representatives are on the same page. Thank you for taking time to address Michelle's questions. If you have any questions, please call me at the numbers listed below. I look forward to hearing and working with you in the future. Thanks again, for your time and consideration.

Best Regards,

Norm
