7/10/13 meeting

Peabody

Southern monitor is a filter monitor

Dust must be from mine (non-rule policy)

Can eliminate RR emissions using monitor between road & RR - RR is theirs & can define times when train passing

- dealing w/ monitor on or just in property line - we can model

- 114 requires keeping filters 2 yrs. (starting July 2012)

7/19/13 Briefing w/ Eileen

Complaints started 2 yr. ago - why?

Peabody offered buy outs

Not subject to TS or PSD (not in 100 source category that subjects fugitives

114: initial agreement to monitor 4 mo. & reeval. (intent to monitor for NAAQS)

July 2012 - Oct 2012 first 4, no NAAQS problem so we dropped as of Nov. 2012

Complaints continued

Looked @ upwind/downwind rule May 2012

Jessie re-evaluated 7-10/12 data w/ this in mind

→ Find Jessie's eval. → look @ G drive

* Filters must be saved 2 yr per 114 - need to send another to keep longer

11/27 113 Prep

→ Look for any new complaints: Ø

8-9 complaints on file, Feb. 6, 2013 most recent

* What have they done since Feb 2013?

Sarah's 4/12 notes of call w/ P.: P says active pit closest to citizen done by May 2012 but complaint continued (photos earlier though)

* Current activity - where are active pits?

* What reclamation activities have happened
