Leviathan Mine 1-17.pdf

Marc—URGENT review needed:

Is the final table here attached correct, or see Yolanda's comment!

Subject: RE: Leviathan Mine Timeline with ARC's treatment system numbers
Importance: High

Now that I look at it I'm concerned. It appears to me that ARC provided the total for ARC + RWQCB (see their footnote). If that's true, these numbers in the timeline are incorrect.

Leviathan Site Treatment Achievements

PWTS (1999-2016), Pond 4 (2001-2016) & ASB (2005-2016) Achievements		
Water Treated	245,152,000	Gallons
Al Removed	448,943	Pounds
As Removed	5,767	Pounds
Fe Removed	812,140	Pounds
Ni Removed	6,771	Pounds

Notes:
1. Removal volumes are calculated from yearly averages.
2. LRWQCB provided PWTS data.
