Subject: some ecorisk references

Hi Tom,

I may think of some more, but in the meantime, two sites I highly recommend for documents that give a detailed presentation of ecotoxicology are:

https://www.epa.gov/chemical-research/ecological-soil-screening-level. This is the US EPA Ecological Soil Screening Level main page with links to the SOPs.

https://rais.ornl.gov/tools/eco_search.php & https://rais.ornl.gov/home/sitemap.html. This is a product of the US DOE Oak Ridge Lab and they have a bunch of links to good tools and tutorials. You might have to register to get access but it's free.

Cheers,

ned
