Subject: RE: Leviathan Mine - Technical Meeting to discuss RTV Calculations, Rationale for the USL, and EPC Calculations

Josh – I discussed attorney participation in next week's Leviathan technical meeting further with Atlantic Richfield. We feel strongly that it is important to keep participation and discussion at a technical level and that there be equal footing among the participants. Because this meeting is major logistical endeavor, and because some participants will be traveling to Sacramento on Sunday, I need confirmation earlier than 5:00 Mountain today (as you suggested) that EPA will restrict lawyer participation to calling in during the last ½ hour or so of the meeting. I understand that you and Julie are doing your best, and I am not trying to alienate anyone or delay progress, but If we can't get this resolved by sometime early this afternoon, the meeting will need to be rescheduled. Please let me know as soon as you can. Thank you.

Team,

Atlantic Richfield is hosting a technical working meeting to review the methodology for calculating reference threshold values (RTVs), the rationale for using the upper simultaneous limit (USL) to calculate RTVs, and the calculation of exposure point concentrations (EPCs). We estimate about two hours will be required to cover each topic; thus, this will be a full day meeting. We are preparing presentation materials designed to guide the discussion and encourage interactive participation.

The meeting will be held at Amec Foster Wheeler's office in Rancho Cordova, CA:

Amec Foster Wheeler

10940 White Rock Road, Suite 190

Rancho Cordova, CA 9570

Alternatively, you can join the meeting remotely via phone/webinar using the below information:

Access Code: [redacted]

To keep the day moving we will have lunch brought in for the group.

Please respond by letting us know your intent to participate and whether it will be in person or via phone/webinar.

Please let me know if you have any questions.

Thanks,

Marc
