6.) **Waste Minimization Description**:

The request and acknowledgement allowing continued exportation of the Metal Hydroxide Sludge (MHS) has resulted in interminable direct-recycling of this material. Since 1998, HADCO has been allowed to ship the copper-rich sludge directly to smelters for metals reclaim, thus reducing overall environmental risks posed through alternative disposal methods. Late in 2013 we increased our drying capacity which resulted in a significant reduction of this waste stream in 2014 (approximately 60%).

7.) **Certification**:

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this and all attached documents, and that based on my inquiry of those individuals directly responsible for obtaining the information, I believe that the submitted information is true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.

Please feel free to contact me at 607-689-5232 should any questions arise concerning this report.
