NDEP also requests that EPA add a slide with more specific callout information on anticipated schedule for the other OUs as we have done for OU-8 in slide 28 of the version Jeff sent on 8/5.

Thanks,
Greg

Subject: Public Meeting Presentation

Sarah, thanks for your patience. We have included our slides after the Wabuska Drain slides. I have a couple overall comments and have inserted them throughout the presentation. You guys may have caught them too, but just in case.

1. I struck through the references to Yerington where I found them.

2. I think the references to OU numbers should always be accompanied by OU- throughout the presentation.

3. I think showing the overall OU map at the beginning of the presentation should suffice. I recommend not including that slide for each OU.

4. I think it would be beneficial to add a groundwater impact extent map that broadly shows the on-site area versus the off-site extent.

Other than that, I think we're pretty good to go unless you have questions about our slides. Thanks.
