Additionally, in order to address concerns about exposures, I think EPA should commit to completing a Superfund Environmental Indicator Human Exposure Under Control determination within a certain period of time.

I had made this suggestion to Roberta Blank at a public meeting several years ago and she indicated this wasn't required at non-NPL sites. We should revisit this.

Angeles and Harry,

Attached are two older documents that contain some of the themes and messages we talked about today with respect to an overall communication strategy.

We look forward to seeing EPA's draft. I'll let Dave Emme know that EPA anticipates providing something next week.

Greg
