Hello Alan

Thank you for your email. We are planning a call later this month with Ginny and the chair to discuss their concerns. I'm hopeful we will be able to address them as we embark on this addressing this longstanding environmental threat.

We will keep you posted on our progress and include you as we proceed ahead.

Unfortunately I won't be at the RTOC because conflicting work travel that entire week.

We will be in touch.

Enrique Manzanilla
Director, Superfund Division
US EPA Region 9

Enrique,

I recently had a phone call with Ginny Hatch of the Yerington Paiute Tribe regarding Superfund staff working on the Anaconda Mine Site not following a prescribed protocol for communication with the Tribe. Ginny shared with me that Superfund staff have been provided a protocol and have been told multiple times by Tribal staff and Tribal Council members that the way communication is being conducted currently is not proper and often leads to confusion. Ginny let me know that she recently left you a voicemail and I just wanted to share that I would like to be included in any updates regarding this situation. I hope that a viable solution to the issue will be reached soon.

Thank you for your help in resolving things and I look forward to seeing you in a few weeks at RTOC.
