Thx. The administrator is emphasizing acceleration of the Superfund and Brownfield remedial process... getting land into productive use sooner; how can we address this while helping Ken understand the basics , being new to EPA? Not for your reply, just to help you prepare for next week.

p.s. Spoke with Lovato and BP here about Anaconda, and Leviathan - will debrief next Monday

Ok, so here where we stand:

OLEM has already delivered the above attachments with pertinent Region 9 NPL and Brownfields information. They pulled this information from existing data and material they already had on hand. We were also producing material in parallel, but to avoid confusion (unless you think otherwise), we're going to stick with what HQs has delivered. We are reconciling our information with theirs and will highlight any glaring disconnects during our briefing. For example, HQs deletion information may be outdated. That's the only one that I think would be significant, but my staff is looking at the HQs material more carefully.

We are producing an additional table of brownfields sites that are ready for reuse which, unlike the xcel spreadsheet attached, includes short descriptions of the potential reuse. We will get that to you by 10 AM.

In response to your emails to Nick, attached is what OLEM sent over to Chad Nitsch (State and Regional Partnerships in the AO) and Derek Threet (Special Assistant in the AO), from whom we received the request. Thanks. Becky
