Yes, RARE paid for the data collection but SHC is now paying for the data analyses. Because this is a RARE project, then the client is Region 5 who requested this study through the RARE process. OAQPS is interested in the findings, but mainly they are interested in what we find out about Marietta.

Subject: A couple of quick questions on the Manganese study

Hi Danelle:

Was this study a RARE project? Also, who are we doing the analysis for in EPA and did they request it? Thanks for your help.

Best,

Ann Brown
